Experience

Gozilla Beirut, Lebanon
Product Manager July 2024 – Present

Murex Beirut, Lebanon
Technical Engineer June 2023 – June 2024

- Designed and implemented scalable, highly available, and secure multi-tier applications using Docker and Kubernetes, enhancing deployment efficiency and system resilience.
- Automated infrastructure provisioning and configuration in AWS environments using Terraform, reducing manual efforts and improving deployment speed.
- Developed and maintained CI/CD pipelines using Jenkins, streamlining code integration and deployment processes.
- Orchestrated complex deployments across multiple environments using Ansible, achieving consistent and error-free releases with a 99.9% success rate.
- Leveraged Splunk for real-time monitoring and analysis of infrastructure and application logs, improving system reliability and reducing downtime by >90%.

XTND Beirut, Lebanon
Software Development Intern November 2022 – January 2023

- Designed and implemented full stack web applications using Laravel for server-side logic and React for dynamic front-end interfaces, ensuring seamless end-to-end functionality.
- Engineered advanced features and optimized backend processes using Laravel, enhancing application performance and server-side efficiency through eloquent ORM, middleware, and service containers.
- Spearheaded the development of interactive and state-driven user interfaces with React, utilizing JSX, hooks, and context API to create responsive and user-friendly web components.
- Actively participated in client meetings to gather requirements and understand user needs, facilitating the translation of client visions into actionable features and product specifications.

Trainsquare Dubai, United Arab Emirates (Remote)
Product Management Intern November 2022 – January 2023

- Collaborated closely with cross-functional Agile teams to define product roadmaps, prioritize backlogs, and ensure timely delivery of features aligned with strategic business goals.
- Facilitated sprint planning, daily stand-ups, and retrospective meetings, fostering a culture of continuous improvement and team cohesion in a fast-paced Agile environment.
